

## Cum conectez Windows 7/8/10 la WiFi din campusul ANMB?

1. Porniți meniul de start prin apăsarea butonului Start sau a tastei Windows (I). În funcție de versiunea de Windows utilizată, va fi afișat meniul de start cu instrumentul de căutare.

2. Porniți aplicația Network and Sharing Center folosind instrumentul de căutare (vezi mai jos).

Windows 7

Windows 10

3. Selectați Manage wireless networks din stânga fereastrei Network and Sharing Center.

- 4. Apasați butonul Add din fereastra Manage wireless networks.
  - Control Panel 
     Network and Internet 
     Manage Wireless Networks

     Manage wireless networks that use (Wireless Network Connection)

     more to the connect to these networks in the order listed below.

     Add
     Adapter proper)
     Profile types
     Network and Sharing Center

     Add a wireless
     I

5. Selectați **Manually create a network profile** din fereastra Manually connect to a wireless network.

) 📶 Man	ually connect to a wireless network	
How d	0 You	
	Manually create a network profile This creates a new network profile or locates any sting network and saves a profile for the network on your computer. You nested know the network name (SBD) and the network of applicable).	
4	Create an ad hoc network This creates a temporary network for sharing files or an Internet connection	
	E	Cance

- 6. Introduceți informații următoarele pentru rețeaua Wifi și dați clic pe Next:
  - Network name: Biblioteca01 sau Biblioteca02
  - Security type: WPA2-Enterprise
  - Encryption type: AES

7. Selectați Change connection settings.
